Cabbage Ornamental

Pigeon

Brassica oleracea

The leaves are densely stacked, neat, and attractive. The plant responds well to growth regulators. Cooler weather enhances its colour vibrancy. Ideal for use in bedding displays, pot planting, vase decoration, and bouquet arrangements.

Growing Information

Cabbage Ornamental Pigeon

• Germination : 3-5 days

• Sowing - ready to use : 65-70 days

• Flower size : 20-25 cm

• Plant height : 15-20 cm

• Plant width : 25-30 cm

Cabbage Ornamental

Nagoya

Brassica oleracea

The leaves are curly and evenly arranged, while the flowers are large and showy. The plant responds well to growth regulators. Cold weather enhances its colour intensity, making it ideal for winter planting.

Big Bright 
Tagetes erecta

- This vigorous, well-branched variety exhibits strong growth and excellent plant structure, producing large, eye-catching yellow-to-orange blooms that create maximum visual impact.
- With consistent and abundant flowering, it delivers high yield, long-lasting color, and outstanding performance in both field and garden conditions.

Growing Information : Short day / Long day		
• Germination	: 3-5	days
• Sowing to Flowering	: 65-70 / 75-80	days
• Flower size	: 9-13	cm
• Plant height	: 70-80 / 95-110	cm
• Plant width	: 60-70 / 90-100	cm

TGE-B122
Yellow

A tall yellow marigold featuring bright, impressive blooms and exceptional performance.

F1 American Marigold

TGE-B122

Tagetes erecta

- Produces large, vibrant yellow flowers with outstanding size and impact, and flowers early for quicker harvests.
- Tall, sturdy stems make it ideal for cut-flower production.
- Strong plant vigor and excellent uniformity ensure consistent, high-quality performance.
- A true advancement in yellow marigold breeding — combining strength, beauty, and reliability for professional growers.

Growing Information : Short day / Long day

• Germination	: 3-5	days
• Sowing to Flowering	: 65-70 / 75-80	days
• Flower size	: 9-12	cm
• Plant height	: 90-100 / 115-125	cm
• Plant width	: 65-80 / 85-100	cm

Laddu Yellow

**Bold shape. Bright presence.
Built to stand out.**

- This variety maintains consistent flower size and high-quality blooms across the entire harvest cycle, making it a reliable choice for growers targeting premium cut-flower markets, decorative displays, and large planting plots.

Ideal for Festival Season Growing

F1 American Marigold

Laddu Yellow

Tagetes erecta

- Laddu Yellow brings a striking visual impact with its perfectly rounded, balloon-formed blooms and neatly layered petal texture that holds its shape beautifully in any setting. The flowers sit proudly on long, strong stems, supported by a large, vigorous bush that fills the field with uniform color and form.

Growing Information : Short day / Long day

• Germination	: 3-5	days
• Sowing to Flowering	: 70-75 / 80-90	days
• Flower size	: 7-8	cm
• Plant height	: 55-80 / 85-100	cm
• Plant width	: 60-80 / 80-100	cm

F1 American Marigold

A24 Yellow

Tagetes erecta

A premium selection for cut-flower production. This variety yields prolific, uniform, medium-sized blooms with dense and beautifully arranged petals. It features long, sturdy stems and a strong, non-splitting calyx fully covered by petals, making it exceptionally ideal for flower garland threading.

Growing Information : Short day / Long day

• Germination	: 3-5	days
• Sowing to Flowering	: 70-80 / 75-90	days
• Flower size	: 7-9	cm
• Plant height	: 70-75 / 100-120	cm
• Plant width	: 65-75 / 80-100	cm

F1 American Marigold

A26 Yellow

Tagetes erecta

Featuring exquisite honeycomb-style petals and a beautifully full bloom form, this premium marigold stands out with its tall plants and long, robust stems. High-yielding, durable, and visually striking, it is perfectly suited for premium garlands, floral decorations, and elegant event styling.

Growing Information : Short day / Long day

• Germination	: 3-5	days
• Sowing to Flowering	: 80-90 / 85-100	days
• Flower size	: 8-9	cm
• Plant height	: 90-100 / 100-120	cm
• Plant width	: 80-100 / 90-110	cm

F1 American Marigold

A20 Orange

Tagetes erecta

Premium quality for cut-flower production.

Features large, vibrant orange blooms with dense, well-arranged petals. Characterized by early flowering, excellent branching, and a vigorous, weather-resistant growth habit.

Growing Information : Short day / Long day

• Germination	: 3-5	days
• Sowing to Flowering	: 60-70 / 75-85	days
• Flower size	: 8-10	cm
• Plant height	: 60-70 / 90-100	cm
• Plant width	: 50-80 / 80-90	cm

F1 American Marigold

A30 Orange

Tagetes erecta

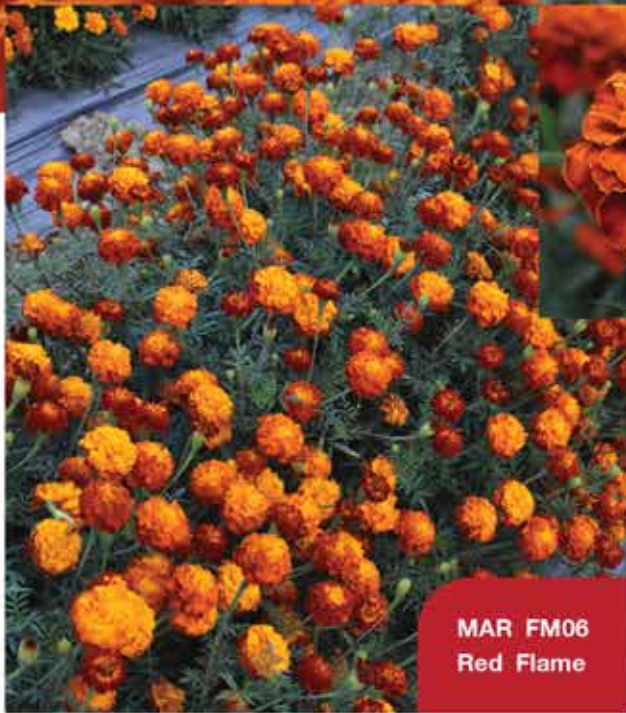

A new standard in orange marigolds.

- Vibrant, uniform orange color
- Dense, well-structured petals
- Medium-sized blooms for versatile use
- Strong field performance and consistency

Growing Information : Short day / Long day

• Germination	: 3-5	days
• Sowing to Flowering	: 70-80 / 80-85	days
• Flower size	: 8-9	cm
• Plant height	: 70-80 / 100-110	cm
• Plant width	: 70-80 / 90-100	cm

MAR FM06
Red Flame

French Marigold *Shades*
TGE-Red Flame
Tagetes patula

Produces masses of vibrant orange to deep orange-red blooms across the entire plant. Flowers are well-formed with dense layered petals and strong stems that hold blooms attractively above the foliage. Ideal for landscape planting, garden displays.

MAR FM19
Honey Bee

French Marigold *Shades*
TGE-Honey Bee
Tagetes patula

A compact and uniform plant habit. Produces abundant medium-sized blooms evenly across the canopy. Flowers display a striking blend of golden yellow and deep orange tones, creating strong visual contrast in landscape plantings. Dense layered petals and strong stems provide an attractive and balanced presentation.

Growing Information

MAR FM06 Red Flame

• Germination : 3-5 days

• Sowing to full bloom : 60-70 days

• Flower size : 3.5-4 cm

• Plant height : 40-60 cm

• Plant width : 50-80 cm

MAR FM19 Honey Bee

• Germination : 3-5 days

• Sowing to full bloom : 65-70 days

• Flower size : 5-6 cm

• Plant height : 30-40 cm

• Plant width : 50-65 cm

French Marigold *Shades*
TGE-Lipstick Kiss
Tagetes patula

This eye-catching bicolor marigold features vibrant yellow blooms with distinct yellow-orange tips, offering an ultra-compact habit and exceptional flowering density. Its superior branching and highly synchronized blooming ensure consistent, impact color, making it perfect for decorative borders, mixed containers, and professional landscaping.

MAR FM38
Lipstick Kiss

French Marigold *Shades*
TGE-Sunset Fire
Tagetes patula

This premium compact French marigold series features dense, double-petaled blooms in vibrant orange and gold, offering exceptional uniformity and a prolific flowering habit.

Limbo
Standard Petunia

Limbo GP is the benchmark genetically dwarf Grandiflora petunia from seed. It has a compact habit but shows strong garden vigor. Growth regulators are generally unnecessary, though a light application can be used if desired. Ideally suited for high-density production in packs or small pots.

Growing Information

Petunia Limbo

• Sowing to full bloom	: 65-75 days	• Plant height	: 15-20 cm
• Germination	: 4-5 days	• Flower size	: 8-10 cm
		• Plant width	: 20-30 cm

SAL001
Sahara

Salvia
Sahara
Salvia Splendens

An outstanding bedding salvia with exceptional vigor and garden performance. 'Sahara Red' amazed us, surpassing others in our range. Vibrant red bloom contrast beautifully with deep green foliage.

Growing Information

Salvia Sahara

• Germination : 4-5 days

• Sowing to full bloom : 75-90 days

• Spike length : 15-20 cm

• Plant height : 20-25 cm

• Plant width : 25-30 cm

SAL010 Blue

SAL013 White

Salvia
Victoria
Salvia Farinacea

A very attractive, uniform Salvia that flowers early on compact plants. Tolerant of both heat and rain.

Growing Information

Salvia Victoria

• Germination : 4-5 days

• Sowing to full bloom : 85-90 days

• Spike length : 15-20 cm

• Plant height : 40-50 cm

• Plant width : 25-30 cm

SAL011 Strata

SAL012 Cirrus

SAL020 Rhea

Salvia
Strata/Cirrus/Rhea
Salvia Farinacea

A salvia group with blue-purple and white tones. Flowers bloom early in long, dense clusters with uniform height. More tolerant of heat and rain than other salvia varieties.

Growing Information

• Germination : 4-5 days

• Sowing to full bloom : 85-90 days

• Spike length : 20-25 cm

• Plant height : 40-50 cm

• Plant width : 25-30 cm

SAL401 Blue
